EDUCATION

NIRMA UNIVERSITY

Bachelor of Technology in Computer Science and Engineering

GPA: 7.66/10, Certificate of Scholar (8th Semester).

Ahmedabad, India

05/25

TECHNICAL SKILLS

- **Full Stack:** React.js, Next.js, Tailwind CSS, Flutter, FastAPI, Node.js, Express.js, PostgreSQL, MongoDB, Docker, Supabase
- **Languages:** Python, JavaScript, TypeScript, C, C++
- **Tools:** Git/GitHub, Postman, Jupyter notebook, Linux, Cursor, Claude Code

EXPERIENCE

Full Stack Developer, Hind Social, Ahmedabad, India | [\[link\]](#) 03/26 – 06/26

- Built the feed ranking algorithm, using OpenSearch to index and score posts on per-user signals for personalized content.
- Leading end-to-end development of Causes, a module letting cause owners launch campaigns (beach cleanups, reforestation, etc.) with configurable donation, volunteer, and supporter workflows; owned the PostgreSQL schema, backend, and REST APIs.

Software Engineer Freelancer, Remote 01/26 - 03/26

- Built a Next.js + Supabase marketing site for a print business with SEO-optimized product and a protected admin CMS.

Software Engineer, Hyperlab Sportech Pvt Ltd, Ahmedabad, India | [\[link\]](#) 09/25 – 12/25

- Built a full stack Next.js platform processing BLE event streams from exercise mats for real time exercise tracking and leaderboards.
- Developed algorithms to detect 35+ exercises on exercise mats. Improved the Detection speed of Mountain-Climb exercise by 55%.
- Built a Lua based UI flow managing multi user exercise sessions with RFID or app-based events, retries, and time-based rules.
- Developed a React dashboard with CSV parsing and interactive Recharts visualizations for LiDAR sensor logs, enabling engineers to annotate anomalies at specific timestamps and export filtered datasets, reducing the debugging time.

Software Developer Intern, Medkart Pharmacy Pvt Ltd, Ahmedabad, India | [\[link\]](#) 01/25 - 07/25

- Revamped 9 core app screens in 12 weeks, thus increasing screen engagement rates in the Medkart app serving 50,000+ users.
- Engineered a scalable sorting and filtering system with 5+ criteria, improving product discovery and search to purchase conversion.
- Reduced customer support response time by 30% by developing the Contact Us module end-to-end with form validation.
- Decreased bounce rates by 28% by implementing responsive loading skeletons on 12+ pages, reducing perceived load time.
- Achieved workflow efficiency with a 75% reduction in user actions by collapsing a 4-step task into 1 tap using Flutter intents.

PROJECTS

DSA PROGRESS TRACKER | [\[GitHub\]](#) | [\[Live\]](#) 08/25 - 08/25

- Built a full stack DSA progress tracking platform using Next.js, TypeScript, Node.js, Express.js, PostgreSQL, and Prisma.
- Automated dataset generation by aggregating TakeUForward sheets with LeetCode, GeeksforGeeks, and Code360 using search APIs and LLM based query refinement, and enriched questions with company tags extracted from LeetCode extension network responses. Built a preprocessing pipeline to deduplicate results and generate a structured JSON dataset for ingestion.
- Designed a scalable relational schema managing 400 plus problems with multi source progress tracking and user editable notes.
- Engineered a responsive UI with infinite scroll, theme toggle, detailed modals, and deployed the platform on Netlify.

E-COMMERCE WEBSITE | [\[GitHub\]](#) 01/25 - 02/25

- Built an e-commerce platform with Admin Dashboards and Customer workflows using Node.js, Express, React, and PostgreSQL.
- Secured user access with JWT-based authentication and enforced RBAC to restrict sensitive route access based on user roles.
- Developed REST APIs for products, cart, orders, and addresses, users with input validation and server-side pagination.
- Engineered the PostgreSQL schema from scratch to ensure referential integrity and scalability for future feature additions.

MATHEX - MATH EQUATION EDITOR LIBRARY | [\[GitHub\]](#) 11/25 - 01/26

- Developed a React component library for building math equation editors with automatic keyboard routing to focused input fields.
- Implemented 13 function categories including Trig, Calculus, Statistics, Probability, and Geometry with subscript/superscript mode.
- Packaged as a tree-shakeable npm library with full TypeScript support using MathQuill, KaTeX, and Vite.

PROGRAMMING/CERTIFICATES

Codeforces: (Problems Solved: 500+) [\[Dev Bachani\]](#)

LeetCode: (Max Rating: 1538) (Solved 300+ problems on Data Structures and Algorithms) [\[Dev22603\]](#)

JavaScript (Intermediate): [\[Certificate\]](#)
